

Workshop

Current research in phytolith analysis

Monday 6 May 2013

Programme

10.00-10.20 h M. Madella & M.R. Calegari

The phytoliths from the Mixed Ombrophile Forest of Santa Catarina (Linhares), Brazil.
An approach through reference collections of plants and soil.

10.30-10.50 h A. Gajardo Pichincura

Análisis de microfósiles en el tártaro dental: una aproximación preliminar a la dieta de los cazadores-recolectores de Cuchipuy, Chile.

11.00-11.20 h J. Bates

Exploring Indus rural agriculture: preliminary phytolith and macrobotanical analysis from two sites in Haryana.

11.30-12.00 h *Coffee break*

12.00-12.20 h D. Rodríguez Antón

Phytolith research on the human and mountain environmental interaction during the Mid-Holocene. A case study in the central Pyrenees.

12.30-12.50 h C. Lancelotti & M. Madella

Phytoliths as proxies for Neolithisation processes in the Western Mediterranean: archaeology and ethnography within the AGRIWESTMED project.

13.00-13.20 h D. Zurro

Phytolith counting methodology

13.30-15.00 h *Lunch break*

15.00-15.20 h W. Out & M. Madella

The identification of non-dietary crop products: distinction between short cells of millet leaves by morphometric analysis.

15.30-15.50 h J.J. García-Granero, W. Out, C. Lancelotti & M. Madella

Sorting South Asian millets: the potential of inflorescence long-cell phytoliths

16.00-16.20 h A. Mosca & M. Diligenti

Towards the development of a virtual research environment for phytolith classification.

Open to everybody, we hope you all come!

Organised by: Dept. d'Arqueologia i Antropologia, Institutió Milà i Fontanals (CSIC)

Place: Sala d'Actes, Institutió Milà i Fontanals. C/Egipcíques, 15, 08001 Barcelona
